4. [UNKNOWN] paper-i

Q3. Answer the following in about 200 words each: 10x4=40 Justify the importance of forms of nutrients, their concentrations and ratios to other nutrients in soil for their uptake and crop growth. /0 Discuss how contingent crop planning helps in dryland agriculture. /0 Explain green-house effect and sources of their emission. /0 Describe aquatic weeds and their control management. /0

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-I.pdf

5. [UNKNOWN] paper-i

Q4. Answer the following in about 200 words each : 10x4=40 (a) Describe Dryland technology and Rainfed agriculture for stabilizing production. 10 (b) Define Land Degradation and discuss the major factors affecting it. 10 (c) Explain the need of Integrated Nutrient Management (INM) in present day agriculture. ^0 (d) Enumerate the agronomic measures for soil and water conservation £ind practices adopted by the farmers. 10 ===== PAGE 4 ===== SECTION B

7. [UNKNOWN] paper-i

Q5. Answer the following in about 150 words each ; 8^=40 (a) Discuss the role of Drip/Sprinkler irrigation system in increasing water use efficiency and productivity. 8 (b) Describe Cropping systems, Intercropping and Relay cropping in agriculture, with examples. <5 (c) Explain the current water pollution issues in agriculture with suitable remedies. 8 (d)

Vermicompost is important in sustainable agriculture. Justify. 8 (e) Discuss Water Harvesting and the role of the Government and NGOs for its promotion. 8

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRICULTURE_PAPER_I.pdf

8. [UNKNOWN] paper-i

Q5. Answer the following in about 150 words each: 8x5=40 Define and explain consumptive use of water, evapotranspiration and water use efficiency. 8 Discuss the significance of advance farm planning for optimum use of resources. 8 What is agricultural cooperative farming ? In what way is cooperative farming helpful to small and marginal farmers? 8 (d) Describe agricultural price policy and instruments of price policy. 8 Discuss the role of farmers' participation in identifying needs of the area for planning and development. 8

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-I.pdf

9. [UNKNOWN] paper-i

Q6. Answer the following in about 200 words each ; 10x4=40 (a) Explain the short term and long term effects of agriculture mechanization. 10 (b) Define Farm Management and explain the role of the farm manager in planning intensive agriculture. 10 (c) Explain about rural employment for women through agricilture. 10 (d) Price fluctuations of agricultural products have an impact on small and marginal farmers. Justify. 10

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRICULTURE_PAPER_I.pdf

10. [UNKNOWN] paper-i

Q6. Answer the following in about 200 words each: 10x4=40 What are drip and sprinkler irrigation? Give their merits and demerits. 10 How does the principle of opportunity cost help farmers to decide what to grow ? 10 Explain marketing of farm products and marketing functions. 10 What is programme planning? Explain its evaluation. 10

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-I.pdf

11. [UNKNOWN] paper-i

Q7. Answer the following in about 200 words each : 10x4=40 (a) What are the problems faced by landless agricultural labourers ? What are the steps taken by the Government in order to intervene in the matter ? 10 (b) Discuss the role of Krishi Vigyan Kendras (KVK) in transfer of technologies to end users. 10 (c) Explain management of wasteland for promoting agricultural production. 10 (d) What is Contractual Farming ? What are its merits and demerits in present day agriculture ? 10 ===== PAGE 5 =====

14. [UNKNOWN] paper-i

Q8. Answer the following in about 200 words each: 10x4=40 What is selective mechanization and progress of farm mechanization ? Explain advantages and disadvantages of farm mechanization. /0 How is indigenous technical knowledge (ITK) useful to formulate the future programmes? /0 Specify the criteria for time of irrigation. /0 Discuss the importance of farm management and its scope, with characteristics. /0 FS/-P-.4472C

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-I.pdf

15. [UNKNOWN] paper-ii

1. Answer the following in about 150 words each: 8x5=40 Describe the mode of origin and growth of cell wall. 8 Define allopolyploidy. Give its applications in crop improvement. 8 Write the factors affecting seed quality. 8 Enlist the enzymes requiring metal activators. 8 Describe chemically induced male sterility. 8

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRICULTURE_PAPER_II.pdf

16. [UNKNOWN] paper-ii

1. Answer the following : 8x3=40 What is the 'powerhouse' of a cell? Describe its structure and label. Describe the Mendel's law of inheritance by giving suitable example. Describe the process of certified seed production in field crops. Describe the conditions to maintain the seed quality during post-harvest processing and storage. Discuss the role of metal ions in enzyme activity.

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-II.pdf

17. [UNKNOWN] paper-ii

2. Answer the following: 2.(a) Distinguish between epistasis and dominance. Explain gene interaction. 15 2.(b) Amongst the seed samples of a particular crop which would you recommend to grower based on the following data? 10 Samples Germination(%) Purity(%) A 85 98 B 88 97 C 91 96 2.(c) Discuss the cyclic and non-cyclic photophosphorylation. 1 5 1 fsi-d-agrc ===== PAGE 2 =====

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRICULTURE_PAPER_II.pdf

18. [UNKNOWN] paper-ii

2. Distinguish between the following : 100=40 Seed production in Self-pollinated and Cross-pollinated crops (giving suitable examples) Heterosis breeding and Mutation breeding Ribonucleic acid and Deoxyribonucleic acid Enzymes and Plant pigments

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-II.pdf

19. [UNKNOWN] paper-ii

3. Distinguish between the following: Diffusion and osmosis. 15 Sex-influenced and, sex-limited characters. 10 Synchrony in flowering and planting ratio of parents. 1 5 Answer the following: What is phytochrome ? Enlist different processes mediated by phytochrome. 15 Give the advantages of molecular markers over other genetic markers. 10 Describe the seed certification and seed quality assurance in India. 15 SECTION 'B'

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRICULTURE_PAPER_II.pdf

20. [UNKNOWN] paper-ii

3. Answer the following : 10x4=40 Describe the methods and significance of maintenance breeding in seed production system. "C4 plants are more water-use efficient compared to C3 plants." Explain by citing suitable examples. "Transpiration is a necessary evil." Explain and justify the statement. Describe the significance of male sterility in hybrid seed production. Mention different types of male sterility.

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-II.pdf

21. [UNKNOWN] paper-ii

4. Answer the following : 10x4=40 Illustrate the plant and animal cells. What is the significance of I3-oxidation in germinating seeds? (e) Discuss orthodox and recalcitrant seeds with examples. (d) Write down the yield components and parameters of cereals, pulses and oilseeds. cycO3o7-octi--4&RC-P/ 42 2 ===== PAGE 3 ===== SECTION—B

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-II.pdf

22. [UNKNOWN] paper-ii

5. Answer the following in about 150 words each: 8x5=40 Importance of pinching in quality production of carnation. 8 Preventive and curative methods against stored grain pests. 8 Integrated management of Fusarium and Verticillium. 8 Entomopathogenic bacteria for pest control. 8 Describe the preservation methods of important fruits. 8

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRICULTURE_PAPER_II.pdf

23. [UNKNOWN] paper-ii

5. Answer/Write on the following : 8x5=40 Discuss the process of minimizing the pesticide residue effects in vegetables. Seed plot technique for virus-free potato seed production Describe the physiological role of gibberellic acid in seed germination process. Mango malformation Importance of carrot and guava in human nutrition

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRI_PAPER-II.pdf

24. [UNKNOWN] paper-ii

6. Answer the following: Give major insect pests of cauliflower and their management. 15 Find out the quantity of Chlorpyrifos 20EC for treating an area which requires 1000 litres of spray fluid at 0.02% strength. 10 Discuss the procurement and processing constraints of food grains 15

Official source: backend/data/pyq/collector/universal-official-pdfs/raw/AGRICULTURE_PAPER_II.pdf

25. [UNKNOWN] paper-ii

6. Answer the following : 10x4=40 Calculate the amount of Malathion 50 EC to treat 50 hectares of flower crop @ 800 litres per hectare. The concentration of spray material to be used is 0.01%. Discuss the problems involved in marketing of vegetables and fruits. What is pruning? Discuss its principles and significance in fruit crops. What is biological control of plant diseases? Discuss its principles. Name the important biocontrol agents and their application against important diseases of crops.
